Advantages of using MadeToTag for generating accessible PDF documents

In this video from 2016 Klaas Posselt talks about why accessibility is the future and how MadeToTag helps to manage this challenge.

Accessible PDF documents, also called tagged PDFs, are often requested by law for many kinds of documents. Besides that, accessible PDFs give a huge additional benefit to all users.

During this session you will learn about these benefits, but also about the basics and you will see an interesting project example on how accessible PDF documents were generated at the "German Federation of Journalists" with axaio MadeToTag.
